DIAMOND DRILL RECORD

HOLE NO. 1

PROPERTY Brouillan Twp., Quebec

SHEET NO. 1

DATE Feb.1976

DIP ANGLES Col. 52°	BEARING N 45 E	LATITUDE 8 + 25 South	STARTED Oct. 8, 1975
	LENGTH 601 ft.	DEPARTURE 16 + 00 E	STOPPED Oct.19, 1975
	LOCATION	ELEVATION	LOGGED BY D. J. Kemp

ROCK			CORE SAMPLES					
FOOTAGE	NAME OF ROCK	DESCRIPTION	SAMPLE NO.	WIDTH	FOOTAGE	ASSAY	ASSAY	ASSAY
0 - 230	O.B.	Casing - bottom 40' all boulders, very bad ground = considerable problems obtaining bedrock due to boulder train						
230 - 601	-	Granodiorite: Possibly quartz diorite. In most part light to dark grey in color, fine grained, with quartz and feldspar phenocrysts throughout. Numerous narrow sections slightly fractured and filled with epidote, quartz and rusty gossan type material						
		240 - 284 - Light to dark grey - thin fractures filled with eipdote.						
		284 - 287.5 - Mafic dyke; dark green, fine grained. Sharp contacts epidote filled fractures, lower contact.						
		287.5 - 405 - Light grey matrix, blue quartz eyes and feldspar phenocrysts. Wedges of greenish black chlorite near bottom of section						
		Seditization 296 - 299 - rusty filled seams 299-311						
		405 - 408 - Trap rock - fine grained apple green. Rusy filled seams above and below this section.						
		454 - 474.6 - Carbonate. Reddish in color (hematitic)						
		END OF HOLE 601						
		All fractures 30° - 35° to core						
		Lost core 334.5 - 337.8

DIAMOND DRILL RECORD

HOLE NO. 2A

PROPERTY Brouillan Twp., Quebec.

SHEET NO. 1

DATE February, 1976

DIP ANGLES	BEARING	LATITUDE	STARTED
Col. 55°	S 45° W	2 + 50 S	Oct. 25, 1975
	LENGTH 509	DEPARTURE 14 + 00 E	STOPPED Nov. 3, 1975
	LOCATION	ELEVATION	LOGGED BY D. J. Kemp

ROCK			CORE SAMPLES					
FOOTAGE	NAME OF ROCK	DESCRIPTION	SAMPLE NO.	WIDTH	FOOTAGE	ASSAY	ASSAY	ASSAY
0 - 210	O.B.	Casing: Overburden penetration very slow due to 40' thick boulder bed just above bed rock.						
210 - 509		Granodiorite: Similar in all respects to Hole No.1. Color light to dark grey fine grained matrix, hard. Quartz eyes and feldspar phenocryst throughout. No mineralization.						
		End of Hole 509'						

Drilled by:
Moderne Diamond Drilling,
Val d'Or, Quebec.

PROPERTY ~~Brouillan Twp., Quebec.~~

SHEET NO. 1

DATE February, 1976

DIP ANGLES Co. 55°	BEARING S 45° W	LATITUDE 2 + 50 S	STARTED Nov. 10, 1975
	LENGTH 600'	DEPARTURE 36 + 00 E	STOPPED Nov. 17, 1975
	LOCATION	ELEVATION	LOGGED BY D. J. Kemp

ROCK			CORE SAMPLES					
FOOTAGE	NAME OF ROCK	DESCRIPTION	SAMPLE NO.	WIDTH	FOOTAGE	ASSAY	ASSAY	ASSAY
0 - 218	O.B.	Casing - Boulder bed last 40' above bedrock						
118 - 600		Granodiorite - Fine grained light to dark grey in color. Phenocrysts or feldspar and quartz eyes ranging in color from white to pale rose. Narrow sections exhibit an abundance of phenocryst.						
		260 - 263 - Mafic dyke - fine grained, dark green.						
		301 - 310 - Minor shearing, minor chlorite.						
		450 - 465 - Mafic dike, fine grained, dark green in color.						
		465 - 595 - Granitic - reddish grey color.						
		595 - 599 - Mafic dike, same as above						
		End of Hole 600'
