

QUEBEC DEPARTMENT OF NATURAL RESOURCES

NEMISCAU LAKE AREA

LEGEND

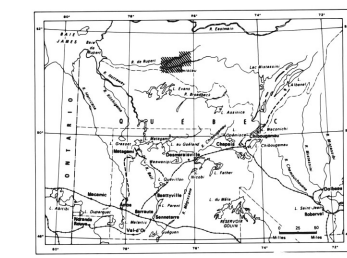

PRECAMBRIAN

- 14 Diabase
- 13 Pink biotite granite and pegmatite
- 12 Quartz syenite
- 11 Monzonite and quartz monzonite
- 10 Quartz diorite and trondhjemite
- 9 Diorite
- 8 White granite and pegmatite
- 7 Migmatite: paragneiss and pink granite
- 6 Migmatite: paragneiss and white granite or pegmatite
- 5 Biotite and biotite-garnet paragneiss
- 4 Interlayered paragneiss and volcanics
- 3 Intermediate volcanics
- 2 Ultra basic rocks; actinolite-tremolite schist, serpentinite, metapyroxenite
- 1 Metabasalt and amphibolite

SYMBOLS

- x Outcrop
- Geological contact assumed or observed
- a b c Strike and dip of foliation: (a) inclined, (b) vertical, (c) dip unknown
- a b Trend of mesoscopic fold axes: (a) plunge known, (b) plunge unknown
- ⊙ Magnetite
- ⊙ Sulfides
- ⊙ Swamp
- Unmapped area

Magnetic declination - 17°30' W

Geological interpretation by:
 J. L. Wallach, 1973
