

- 10 Unconsolidated deposits
- 9 Pegmatite
- 8 Granite porphyry
- 7 Gneissic biotite granite
- 6 Schistose gabbro
- 5 Hornblende gabbro
- 4 Schists of sedimentary origin
- 3 Quartzite
- 2 Banded gneiss
- 1 Metasedimentary gneisses & schists
- Observed outcrop
- Geological boundary
- Fault
- Anticlinal axis, synclinal axis
- Strike and dip of bedding: inclined, vertical
- Strike and dip of schistosity: inclined, vertical
- Strike and dip of gneissosity: inclined, vertical
- Direction and plunge of lineation
- Direction of glaciation
- Swampy area
- P, R, F Portage, rapids, falls

MICHAUD LAKE AREA
WEST HALF.
DUPLESSIS COUNTY, P.Q.
