- Magnetometer stations along profile lines  
 - Relative values of the vertical component of the natural magnetic field in Quebec (U.S. Bureau of Geology, U.S. Geological Survey, 1924)  
 - Magnetic profile scale 2000 ft to the inch  
 - North-south component of magnetic field (direction of the magnetic anomaly) as indicated by the arrow  
 - Station points 1/4 mile apart  
 - The magnetic field lines shown on this map are based on the magnetic field of Quebec, 1924. The magnetic field lines in this map are based on the magnetic field of Quebec, 1924.  
 - The magnetic field lines shown on this map are based on the magnetic field of Quebec, 1924.

Calculations of magnetic field lines by E. Rouleau & Th. Koussine  
 Measurements & calculations by E. Rouleau & Th. Koussine
