FOR ANNUAL REPORT:

BUFFADISON GOLD MINES LTD:

Buffadison Gold Mines Limited, being financed by Buffalo Canadian Gold Mines Limited, Anglo-Huronian, Newmont Mining and Noranda, owns 687 acres adjoining the west boundary of Bevcourt. The property was acquired from Madison Gold Mines in 1945.

During the year, 11 diamond drill holes totalling 10882 feet were put down on the property. Mr. Andrew Robertson, consulting engineer, reports that "ore intersections have been obtained with unusual consistency and two main veins have been developed. The veins lie about 200 feet on either side of and parallel to a syenite porphyry dike which intrudes a granodiorite intrusive body." The south zone has been intersected by six consecutive holes over a length of 800 feet averaging 0.70 oz. across 3.5 feet. The north zone has been intersected by five holes over a length of 500 feet averaging 0.42 oz. across 6.6 feet. According to the consulting engineer, arrangements have been made to sink a shaft in 1946 to an objective of 1000 feet with levels at 150 ft. intervals.

Maurice Lafontaine, P. Eng.,
Inspector of Mines.
