ATTN: Darren Smith

CERTIFICATE OF ANALYSIS

667 Soil samples were submitted for analysis.

The following analytical packages were requested: Code 1A2 Au - Fire Assay AA
Code UT-6 Total Digestion ICP & ICP/MS

REPORT **A11-9924**

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend reassay by fire assay gravimetric-Code 1A3

CERTIFIED BY :

A handwritten signature in black ink, appearing to be "Emmanuel Esemé". The signature is written in a cursive, somewhat stylized font.

Emmanuel Esemé , Ph.D.

ATTN: Darren Smith

CERTIFICATE OF ANALYSIS

279 Soil samples were submitted for analysis.

The following analytical packages were requested: Code 1A2 Au - Fire Assay AA
Code UT-6 Total Digestion ICP & ICP/MS

REPORT **A11-11134**

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend reassay by fire assay gravimetric-Code 1A3

CERTIFIED BY :

A handwritten signature in black ink, appearing to read "Emmanuel Esemé". The signature is written in a cursive style with some loops and is positioned above a horizontal line.

Emmanuel Esemé , Ph.D.

ATTN: Darren Smith

CERTIFICATE OF ANALYSIS

439 Soil samples were submitted for analysis.

The following analytical packages were requested: Code 1A2 Au - Fire Assay AA
Code UT-6 Total Digestion ICP & ICP/MS

REPORT **A11-11876**

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend reassay by fire assay gravimetric-Code 1A3

CERTIFIED BY :

A handwritten signature in black ink, appearing to read "Emmanuel Esemé". The signature is stylized and somewhat illegible due to the cursive nature of the writing.

Emmanuel Esemé , Ph.D.

CERTIFICATE OF ANALYSIS

4 Soil samples were submitted for analysis.

The following analytical packages were requested: Code 1A2 Au - Fire Assay AA
Code UT-6 Total Digestion ICP & ICP/MS

REPORT **A11-14874**

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend reassay by fire assay gravimetric-Code 1A3

CERTIFIED BY :

A handwritten signature in black ink, appearing to read "Emmanuel Esemé". The signature is stylized and somewhat abstract, with several loops and flourishes.

Emmanuel Esemé , Ph.D.

APPENDIX 7A: 2010 AND 2011 TRENCH ATTRIBUTES

Appendix 7a: 2010 and 2011 Trench Attributes

| Claim | Expl Area | Trench ID Current | Trench Nickname | Survey Method | Easting NAD 83 / Zone 19 | Northing NAD 83 / Zone 19 | Date Started | Approx Volume Excavated (m ³) | Main Lithology | Samples Analyzed | Sample List | Purpose of Trench | Trench Notes | Reclaimed | Date Reclamation Completed |
|---------|-------------|-------------------|-----------------|--|--------------------------|---------------------------|--------------|---|--------------------------------|---|--|---|--|-----------|----------------------------|
| 2087790 | Ashram | TR10-014 | - | Handheld GPS, Compass and Topofil, adjusted to satellite image | 536097 | 6312012 | Jul-2010 | 56.3 | Glim / alb amph phlogopilitite | 3 channel, 1 comp | 87301, 87302, 87303, 87605 (comp) | Targeted western contact of Ashram Deposit | Trench filled with water and mud after rain. Pumped out and managed to get 3 samples. No real mapping completed as water had no place to drain. Contact was not located. | No | - |
| 2087760 | Star Trench | TR10-015 | German | Handheld GPS, Compass and Survey Chain, adjusted to satellite image | 537282 | 6310086 | 11-Jul-2010 | 80.5 | Carb / non-Carb (±phoscorite) | 15 channel | 67726, 67727, 67728, 67729, 67730, 87314, 87315, 87316, 87317, 87318, 87319, 87320, 87321, 87322, 87323 | Area of increased RA south of TR08-008 with coincident mag anomaly. Hand digging yielded subcrop with magnetite | Very blocky subcrop, trench very similar to Star Trench (TR08-008) in terms of RA, mineralization, and lithology | No | - |
| 2087774 | Star Trench | TR10-016 | New German | Handheld GPS, Compass and Survey Chain, adjusted to satellite image | 537411 | 6310160 | Jul-2010 | 9.3 | Glim / dol-Carb | 2 channel | 87324, 87325 | Elevated RA at surface, hand digging yielded shallow Carb subcrop | Low grade Ta-Nb mineralization confirmed from sampling. No further work done. | No | - |
| 2087800 | Miranna | TR10-017A | Miranna | Handheld GPS | 537392 | 6313026 | Jul-2010 | 42.1 | dol-Carb / Non-Carb | 8 channel, 10 soil samples (over two vertical profiles) | 87304, 87305, 87306, 87307, 87308, 87309, 87310, 87311 | Evaluate area of soil anomalies up to 8,500 cps, RA elevated all over area | Bedrock was reached but was unmineralized in Ta-Nb-REE. RA decreased with depth suggested source further south | No | - |
| 2087800 | Miranna | TR10-017B | Miranna | Handheld GPS | 537390 | 6313050 | Jul-2010 | 32.4 | Non-Carb | 2 channel, 5 soil samples (over one vertical profile) | 87312, 87313 | Evaluate area of soil anomalies up to 8,500 cps, RA elevated all over area | Bedrock was reached but was unmineralized in Ta-Nb-REE. RA decreased with depth suggested source further south | No | - |
| 2087800 | Miranna | TR10-017C | Miranna | Handheld GPS | 537394 | 6313001 | 2-Aug-10 | 18.5 | N/A | 1 soil sample | - | Attempt to trace soil profile mineralization from TR10-017A and B | Trench abandoned before bedrock reached. Notes very poor but trench is believed have flooded. | No | - |
| 1007890 | Triple D | TR11-018 | DDD-B | Handheld GPS, simple sketch (2011, 2013) | 535760 | 6313629 | 22-Apr-11 | 11.2 | Not Documented | No | Three boulders samples were collected but were not sent for assay (100701A, 100702, 100703) | Try and get more information than soils for which to target drill hole | Excavated late in the 2011 winter drill program using a D5 CAT. Bedrock was exposed on south end of trench but not sampled. Max CPS of 1,500 recorded in trench. Trenching not overly positive but dth still completed in area. | Yes | 2011 |
| 1007890 | Triple D | TR11-019 | DDD-A | Handheld GPS, simple sketch (2011, 2013) | 535717 | 6313760 | 23-Apr-11 | 5.7 | Not Documented | No | - | Try and get more information than soils for which to target drill hole | Excavated late in the 2011 winter drill program using a D5 CAT. Bedrock was exposed on but not sampled. Max CPS of 1,050 recorded in trench. Trenching not overly positive and no dth was completed. | Yes | 2011 |
| 2087790 | Ashram | TR11-020 | - | Handheld GPS, Compass and Topofil, adjusted to satellite image | 536092 | 6312201 | 17-Jun-11 | 12.7 | N/A | No | - | Attempt to located Ashram Deposit's western contact to confirm pads for EC11-060 and 061 are not too far west | Excavated with D5 CAT but failed to reach bedrock and was abandoned. Max CPS of 1,000 noted in trench. | No | - |
| 1007883 | West Rim | TR11-021A | - | Handheld GPS, simple sketch (2013) | 535131 | 6312587 | Aug-2010 | 1.8 | N/A | 2 boulders | 92940, 92941 | Evaluate background RA of 1,000 CPS with coincident airborne Th high and mag low, little OC in area | Abandoned before hitting encountering bedrock with only boulders found. Kept filling up with water preventing further excavation. Max CPS of 1,100 recorded in trench. | No | - |
| 1007883 | West Rim | TR11-021B | - | Handheld GPS, simple sketch (2013) | 535138 | 6312602 | Aug-2010 | 10.8 | N/A | 1 boulder | 92942 | Evaluate background RA of 1,000 CPS with coincident airborne Th high and mag low, little OC in area | Abandoned before hitting encountering bedrock with only boulders found. Kept filling up with water preventing further excavation. Max CPS of 1,100 recorded in trench. | No | - |
| 1007883 | West Rim | TR11-021C | - | Handheld GPS, simple sketch (2013) | 535099 | 6312607 | Aug-2010 | 4.2 | N/A | 1 boulder | 92943 | Evaluate background RA of 1,000 CPS with coincident airborne Th high and mag low, little OC in area | Abandoned before hitting encountering bedrock with only boulders found. Kept filling up with water preventing further excavation. Max CPS of 1,130 recorded in trench. | No | - |
| 2087796 | Beckling | TR11-022A | Beckling 1 | DGPS waypoints collected along centreline of trench, compass and topofil | 539129 | 6312892 | 16-Aug-11 | 27.8 | dol-Carb / Non-Carb (minor) | 23 channel | 107994, 107995, 107996, 107997, 107998, 107999, 108000, 109901, 109902, 109903, 109904, 109905, 109906, 109907, 109908, 109909, 109910, 109911, 109912, 109913, 109914, 109915, 109916 | Evaluate new carbonatite showing outside of main complex. High RA associated with fluorite present indicating mineralization. Attempt to better orient dth | Trenching confirmed sizable bedrock carbonatite source to RA with abundant fluorite present indicating potential REE mineralization. Orientation of rock fabric and contacts allowed for more optimal orientation of drill. Max CPS of ~10,000 recorded in trench. | No | - |
| 2087796 | Beckling | TR11-022B | Beckling 2 | Handheld GPS, Compass and Topofil | 539110 | 6312913 | 17-Aug-11 | 16.2 | dol-Carb | 8 channel | 109917, 109918, 109919, 109920, 109921, 109922, 109923, 109924 | Evaluate new carbonatite showing outside of main complex. High RA associated with fluorite present indicating mineralization. Attempt to better orient dth | Trenching confirmed sizable bedrock carbonatite source to RA with abundant fluorite present indicating potential REE mineralization. Max CPS of 3,300 recorded in trench. | No | - |
| 2087804 | Beckling | TR11-022C | Beckling 3 | Handheld GPS, Compass and Topofil | 539091 | 6312931 | 15-Aug-11 | 11.2 | dol-Carb | 6 channel | 109925, 109926, 109927, 109928, 109929, 109930 | Evaluate new carbonatite showing outside of main complex. High RA associated with fluorite present indicating mineralization. Attempt to better orient dth | Trenching confirmed sizable bedrock carbonatite source to RA with abundant fluorite present indicating potential REE mineralization. Max CPS of 5,800 recorded in trench. | No | - |
| 2087796 | Beckling | TR11-023 | Beckling 4 | DGPS waypoints collected along centreline of trench | 539215 | 6312858 | 5-Sep-11 | 54.1 | dol-Carb / non-Carb | 19 channel | 87696, 107976, 107977, 107978, 107979, 107980, 107981, 107982, 107983, 107984, 107985, 107986, 107987, 107988, 107989, 107990, 107991, 107992, 107993 | Evaluate new carbonatite showing outside of main complex. Area of high RA southeast of TR11-022A with dol-Carb outcroppings. Attempt to further evaluate for potential dth. | Trenching confirmed sizable bedrock carbonatite source to RA with abundant fluorite present indicating potential REE mineralization. Max CPS of 7,500 recorded in trench. | No | - |

**APPENDIX 7B: 2010 AND 2011 TRENCH SAMPLE LOCATIONS AND
DESCRIPTIONS**

Appendix 7b: 2010 and 2011 Trench Sample Locations and Descriptions

| Sample ID | Year Sampled | Trench ID | General Location | Easting N83Z19 | Northing N83Z19 | Sample Length (m) | Sample Type | Max CPS | Bag CPS | Basic Litho | Sample Description | Date Sampled |
|-----------|--------------|-----------|------------------|----------------|-----------------|-------------------|-------------|---------|---------|----------------|---|--------------|
| 67726 | 2010 | TR10-015 | Star Trench Area | 537277 | 6310096 | 0.83 | Chip | - | 490 | Glim-dol-Carb | m.g., Glim (~30%), dol (gr, ~60%), dol (y, ~10%, vn cutting sharp through) | 9-Aug-10 |

CERTIFICATE OF ANALYSIS

1 Pulp sample and 34 Rock samples were submitted for analysis.

The following analytical packages were requested: Code 8-REE-Rare Earth Element Pkg Major Elements Fusion ICP(WRA)/Trace Elements Fusion ICP/MS(WRA4B2)
Code 8-XRF Assay Package Fusion-XRF

REPORT A10-5394 (i)

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

Total includes all elements in % oxide to the left of total.
Values which exceed the upper limit should be assayed for accurate numbers.

CERTIFICATE OF ANALYSIS

56 Rock samples were submitted for analysis.

The following analytical packages were requested:

REPORT A11-12462-8REE,F,

Code 1A2 Au - Fire Assay AA
Code 4F-F Fusion Specific Ion Electrode-ISE
Code 8-REE Assay Package Major Elements Fusion
ICP(WRA)/Trace Elements Fusion ICP/MS(WRA4B2)
Code 8-XRF Assay Package Fusion-XRF
Code Weight Report Received and Pulp Weights

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend reassay by fire assay gravimetric-Code 1A3
Total includes all elements in % oxide to the left of total.
Values which exceed the upper limit should be assayed for accurate numbers.

CERTIFICATE OF ANALYSIS

56 Rock samples were submitted for analysis.

The following analytical packages were requested:

REPORT A11-12462-Nb

Code 1A2 Au - Fire Assay AA
Code 4F-F Fusion Specific Ion Electrode-ISE
Code 8-REE Assay Package Major Elements Fusion
ICP(WRA)/Trace Elements Fusion ICP/MS(WRA4B2)
Code 8-XRF Assay Package Fusion-XRF
Code Weight Report Received and Pulp Weights

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend reassay by fire assay gravimetric-Code 1A3
Total includes all elements in % oxide to the left of total.
Values which exceed the upper limit should be assayed for accurate numbers.

Footnote: P2O5 interference on Zr/Nb/Ta/Hf

|----------|--------|-----------|------------------|--|-----------|---------|---------------|-----|
| | | | | | | | DEPTH (m) | CPS |
| 0.00 | ~3.18 | - | | <p><u>OVB and bldrs and unconsolidated material (no fizz with hcl)</u></p> <p>all carb with fl and one r siltstone? no starter block. only a block at 5.13 m. so had to work back. 3.18 is approximate.</p> | | | | |
| ~3.18 | 24.64 | - | | <p><u>F-Carb with perv flc</u></p> <p>unit is v.f.g, ol-gy (5Y 4/1). this colour is dominant throughout unit with subsections of lt ol-gy mixed in (5Y 6/1). mineralization: flc (r-br, cr-bg, perv), dol, fl, py (minor throughout interval, patches of equant grains). two types (or settings) of p fl are pressed.</p> <p>1 - filling healed fractures. flc appears to be mostly flc with little other mins mixed in. frags infilled with fl are occasionally occurring and on the order of 1-2 mm. they are not the dominant fl phase. orientations vary and cross each other. Excellent example @10.50-10.80 m. surfaces of open frags do not display druzy fl or if so it is minimal, 2 - as patches (these textures give the rock a mottled or psd-brc appearance and are the dominant phase of flc) , bnds (irregular orientation generally), and/or blebs. this fl has common r-br to cr-br mins (flc) within and strangely associated (sometimes flc>fl giving a dominant r hue to areas that appear fl). r br.cr-br blebs also on there own as well they appear to be perv but it is hard to tell.</p> <p>note: day shift had many troubles drilling in m. they did not understand that 10 ft ≠ 3 m. from start of hole to ~5.13 depth infor is very suspect. doubling of blocks and short runs (<2m) with 3 m blk used no matter what have caused uncertainty in exact depths. hole may be off by several m's, but no way to confirm.</p> | | | | |

|----------|--------|-----------|------------------|--|-----------|---------|---------------|-----------------------------------|
| | | | | | | | DEPTH (m) | CPS |
| 0.00 | 2.12 | OVB | - | <u>Ovb</u> overburden/incasing | | | 2.00-13.00 | 400-500 |
| 2.12 | 58.91 | dol-Carb | A | <u>(fl) dol-Carb</u> colour varies in sections from v lt gy to lt gy and lt ol-gy to ol-gy in some sections, locally dusky y. lt gy to v. lt gy dol-Carb is often overprinted by y-gy and cr-tan carbonates creating a mottled text (especially in bottom half), fl occurs overall in a minimal amount but can be abnt in sections and is itsl (what might be broken patches) and in patches, gy-r mnz? is associated with fl and can locally exceed fl mineralization; there are few sections of lt ol-gy to ol-gy F-Carb ('heavy zone') of < 1m; few 10 sections of brc; common late-stage dol-Carb dykes of few cm; common late-stage fl dol qtz vnlt, that cut dykes. modal mineralogy - dol (and other carbonates), fl 4-5%; mnz? 3-4%; sul/oxides trace; qtz trace. first 1.5 m are more or less broken core, but it seems to be bedrock, not bldrs. 2.12 m to 13 m - RA is pretty low, while text and mineralogy is similar to the rest of the unit → didn't cut it out. 2.12 m to 7.30 m - y-gy carbonates, that might be associated with mnz?, dominate over lt gy dol-Carb, lim occurs frequently on fracs as well as on altd patches. (lim) | | | 13.00-44.00 | 600-800 (~1000 in a few sections) |
| | | | | | | | 44.00-end | 1000-1200 |

| FROM (m) | TO (m) | ROCK TYPE | PROVISIONAL ZONE | DESCRIPTION | STRUCTURE | TEXTURE | RADIOACTIVITY | |
|-------------|-----------|-----------|---------------------|---|----------------|---------|---------------|-----|
| | | | | | | | DEPTH (m) | CPS |
| | | | | 2.12 m to 3.10 m - perv gy-r mnz? with less fl in abnt blebs and small patches. (mnz?) | | | | |
| | | | | 3.35 m to 3.55 m - lt ol-gy to ol-gy F-Carb with 2% REE ND/LA 1:1 XRF-results. sharp ctc to lt gy dol-Carb on one side, other ctc is not visible due to drill problems. | F-Carb (dyke?) | | | |
| | | | | 5.30 m to 5.50 m - perv mnz? mineralization of ~8% with less fl, both in small patches → 6% REE XRF-assay. | | | | |
| | | | | 7.60 m - few bio-rich clsts and patches of 1-3 cm. | | | | |
| | | | | 8.80 m to 9.90 m - increased gy-r mnz? in min to abnt blebs and small patches giving it a blebby text, similar from 11.50 m to 12.50 m. | | | | |
| | | | | 13.00 m to 40.60 m - mostly lt gy v.f.g. dol-Carb with min fl in patches, locly perv; often itsl fl, which seems more like broken patches; late stage fl Qtz vnls are common in this section; mnz? occurs with fl, but is less abnt overall than in prev section. | | | | |
| | | | | 13.40 m to 13.90 m - increased mnz? content (~5-6%), with fl, similar: 14.80-14.90 m, 17.75-18.05 m, 18.95-19.25 m. | | | | |
| | | | | 14.40 m - irregular ilm-rich vn of 1-4 mm → Nb~6000 ppm. | | | | |
| | | | | 14.80 m - blebby fl in v.f.g dol-Carb with a bnd of 10 in between, where amph is present instead of fl, text does not change at all, looks like a simple replacement of fl by amph → doesn't make sense, no clever comment on that one. | | | | |
| | | | | @ 15.40 m - patch with min amph, that looks like it is grown in vugs. | | | | |
| | | | | @ 17.35 m - 10 cm vn of brc dol-Carb, most of dol-Carb clsts are sharp and toothed(?), several clsts are f.g. v. lt gy to w dol-Carb, clst-sup brc, brc by sul-rich dk gy gdmass with min Nb-rich ilm → brc by sul-rich hydrothermal fluid. | | | | |
